

The Geographic Areas Reference Map Series for American Samoa includes two map types:

1. *State-Based County Outline Map* - This small-scale outline map shows and labels all of the county or county-equivalent entities within a state or state equivalent. County-equivalent entities for the island areas include district, island, and municipality.
2. *County Reference Map* - This small-scale reference map shows and labels geographic entities that are wholly or partially within the subject county or county equivalent. Geographic entities shown include county subdivisions (census subdistrict, county, election district, and municipality), incorporated places (villages), and census designated places.

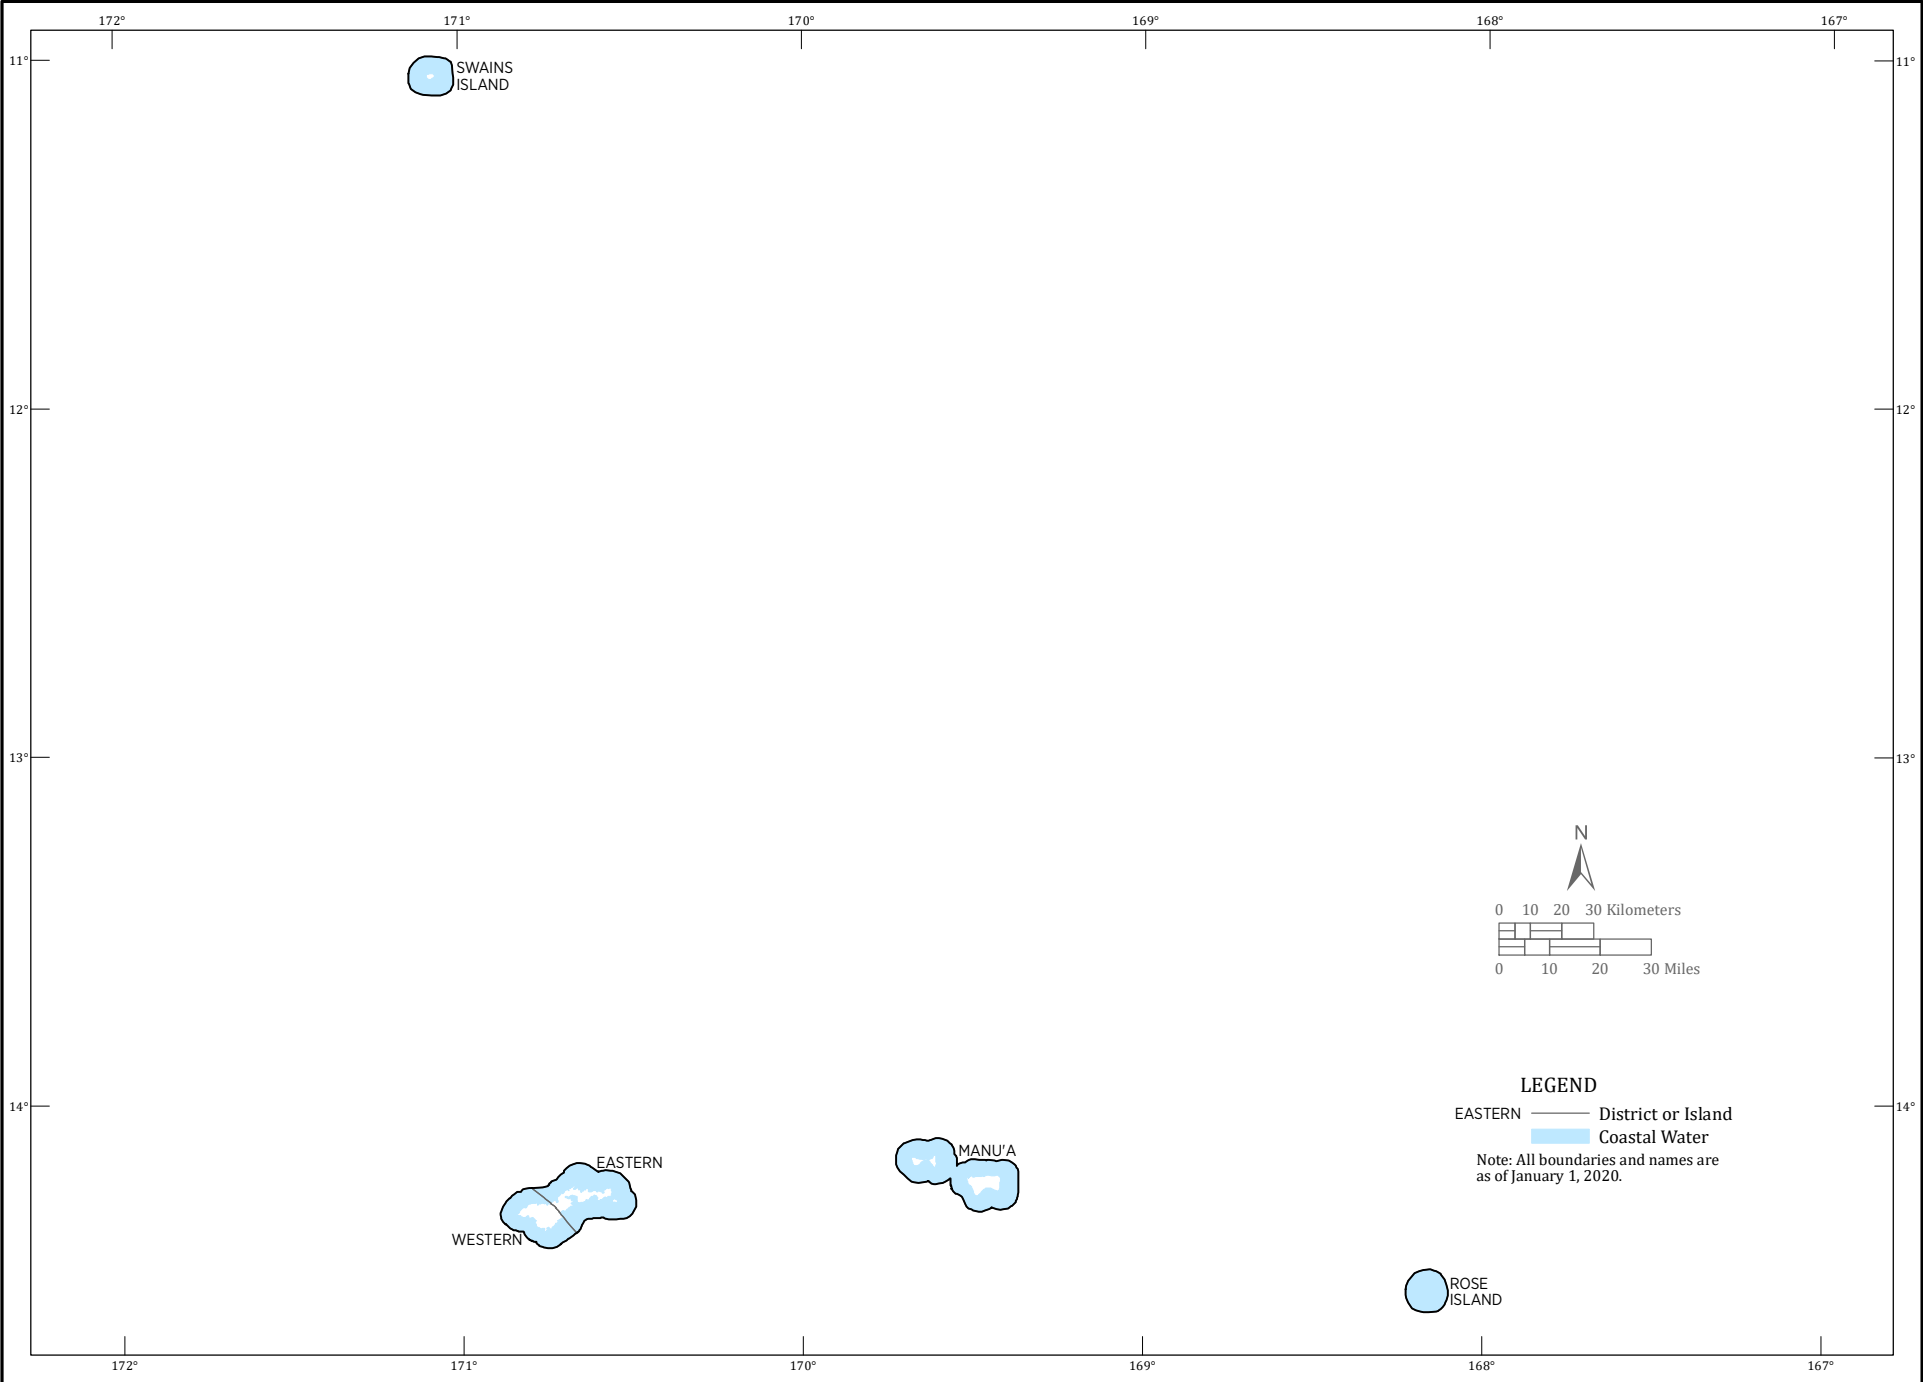

All legal and statistical area boundaries and names are as of January 1, 2020. The boundaries shown on these maps are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

American Samoa District and Island Outline Map

Island and District-Based Map Legend

		American Samoa		Tula	Village ¹
	EASTERN	Subject Island or District		<i>Pacific Ocean</i>	Selected River, Lake, or other Water Body
	WESTERN	Other Island or District within American Samoa		A fishhook joins contiguous and/or discontinuous parts of the same geographic entity.	
	SUA	County ¹			

¹ A '*' following a village name indicates that the village is coextensive with a separate county. The county name is shown only if different than the name of the village.

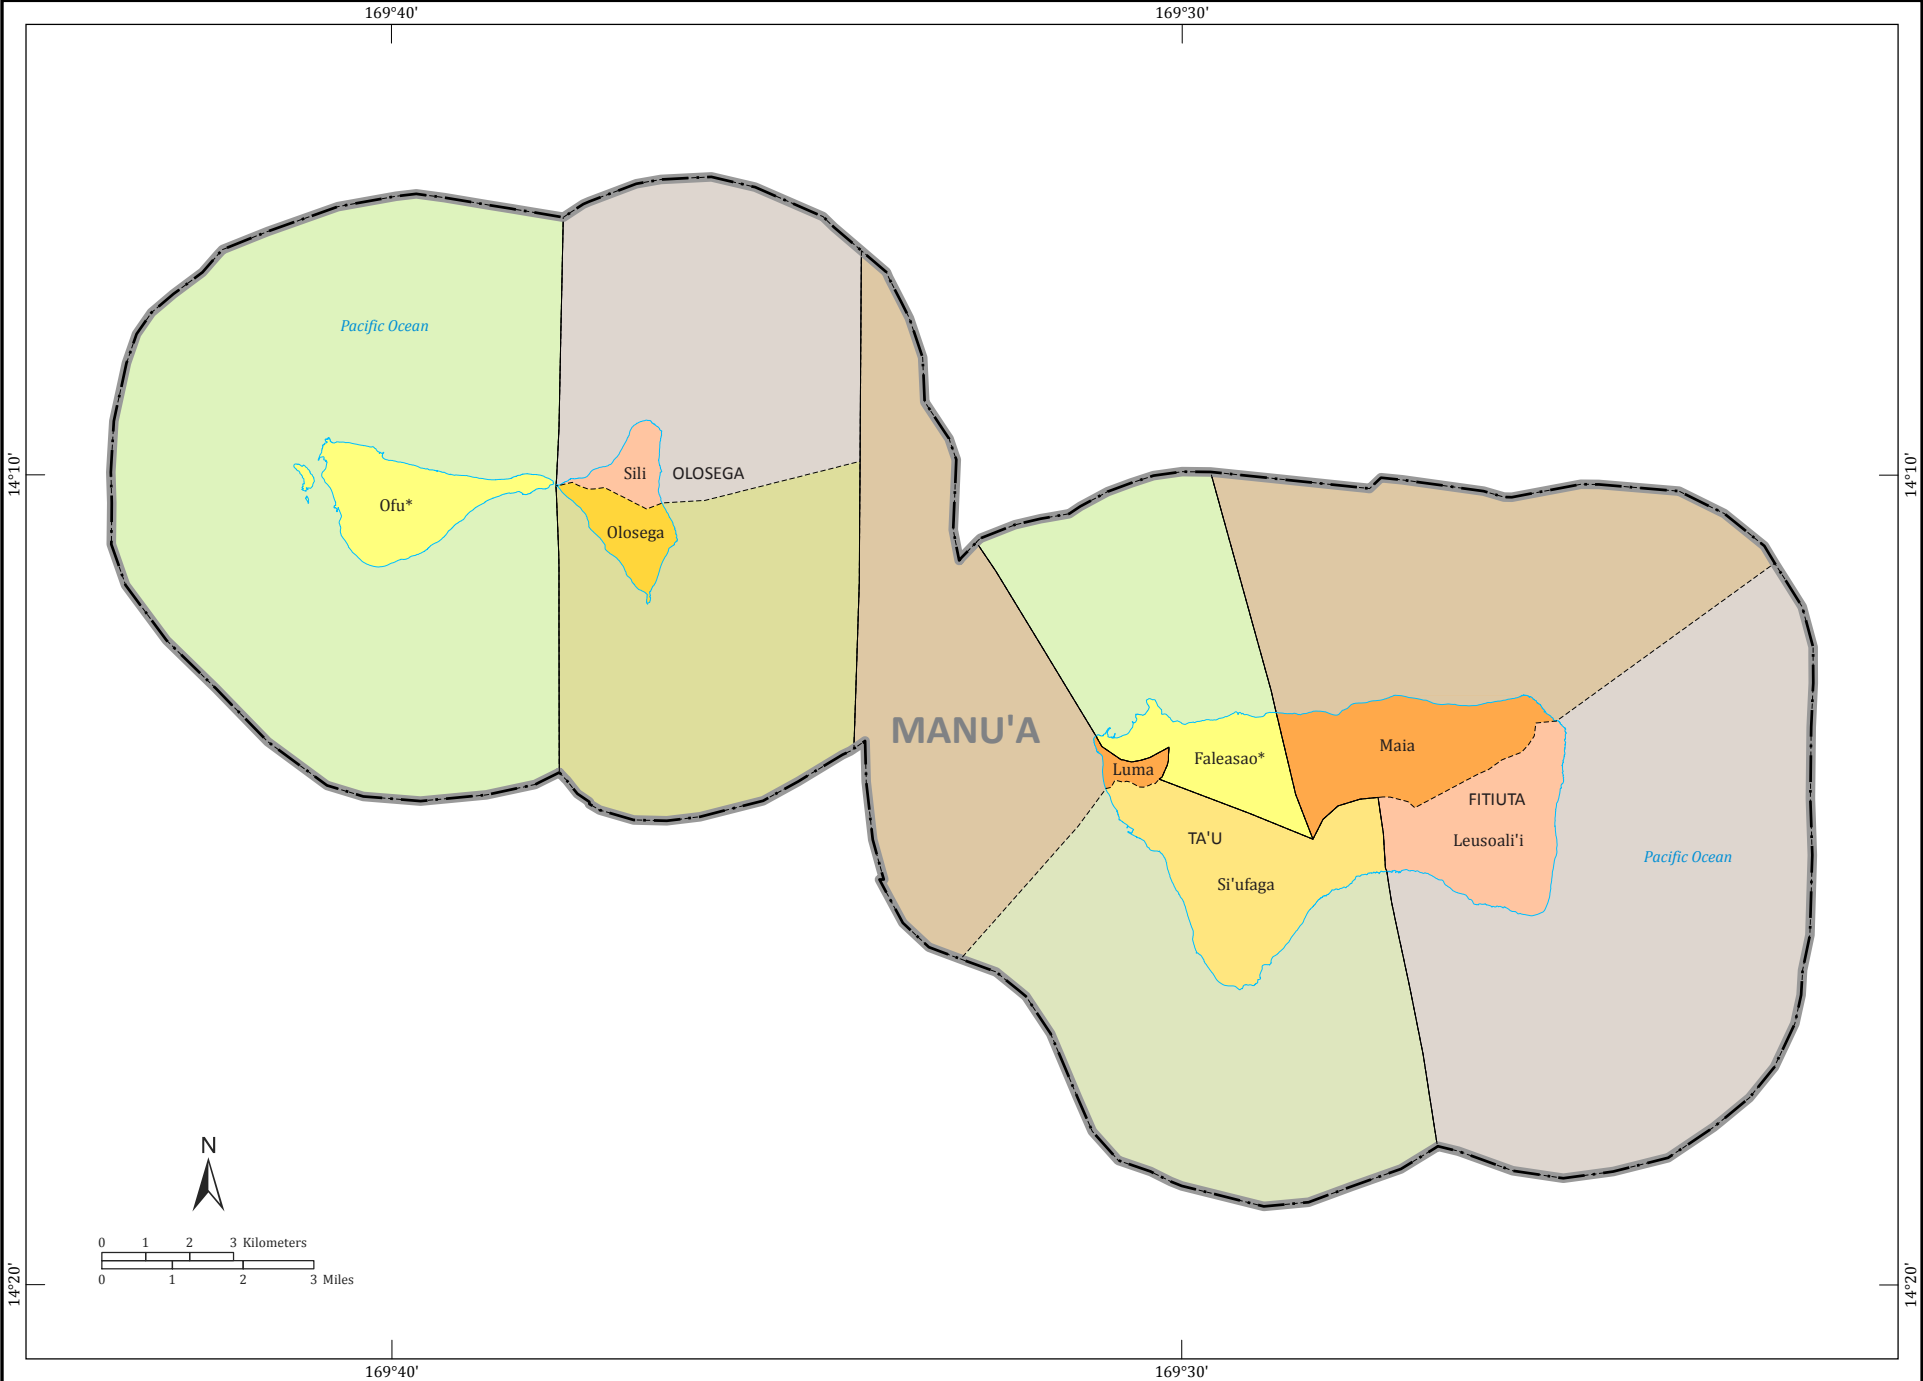

Note: Where American Samoa, island or district, and/or county boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The island or district boundary is always shown. Where a county boundary symbol coincides with a village boundary, the map does not show the village boundary symbol. Any geographic entity name may include '(pt)' if some portion of the entity extends beyond the limits of the subject island or district, or if multiple discontinuous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts)' if many discontinuous pieces exist for that entity that cannot be discretely labeled.

Data Vintage: All legal and statistical area boundaries and names are as of January 1, 2020.

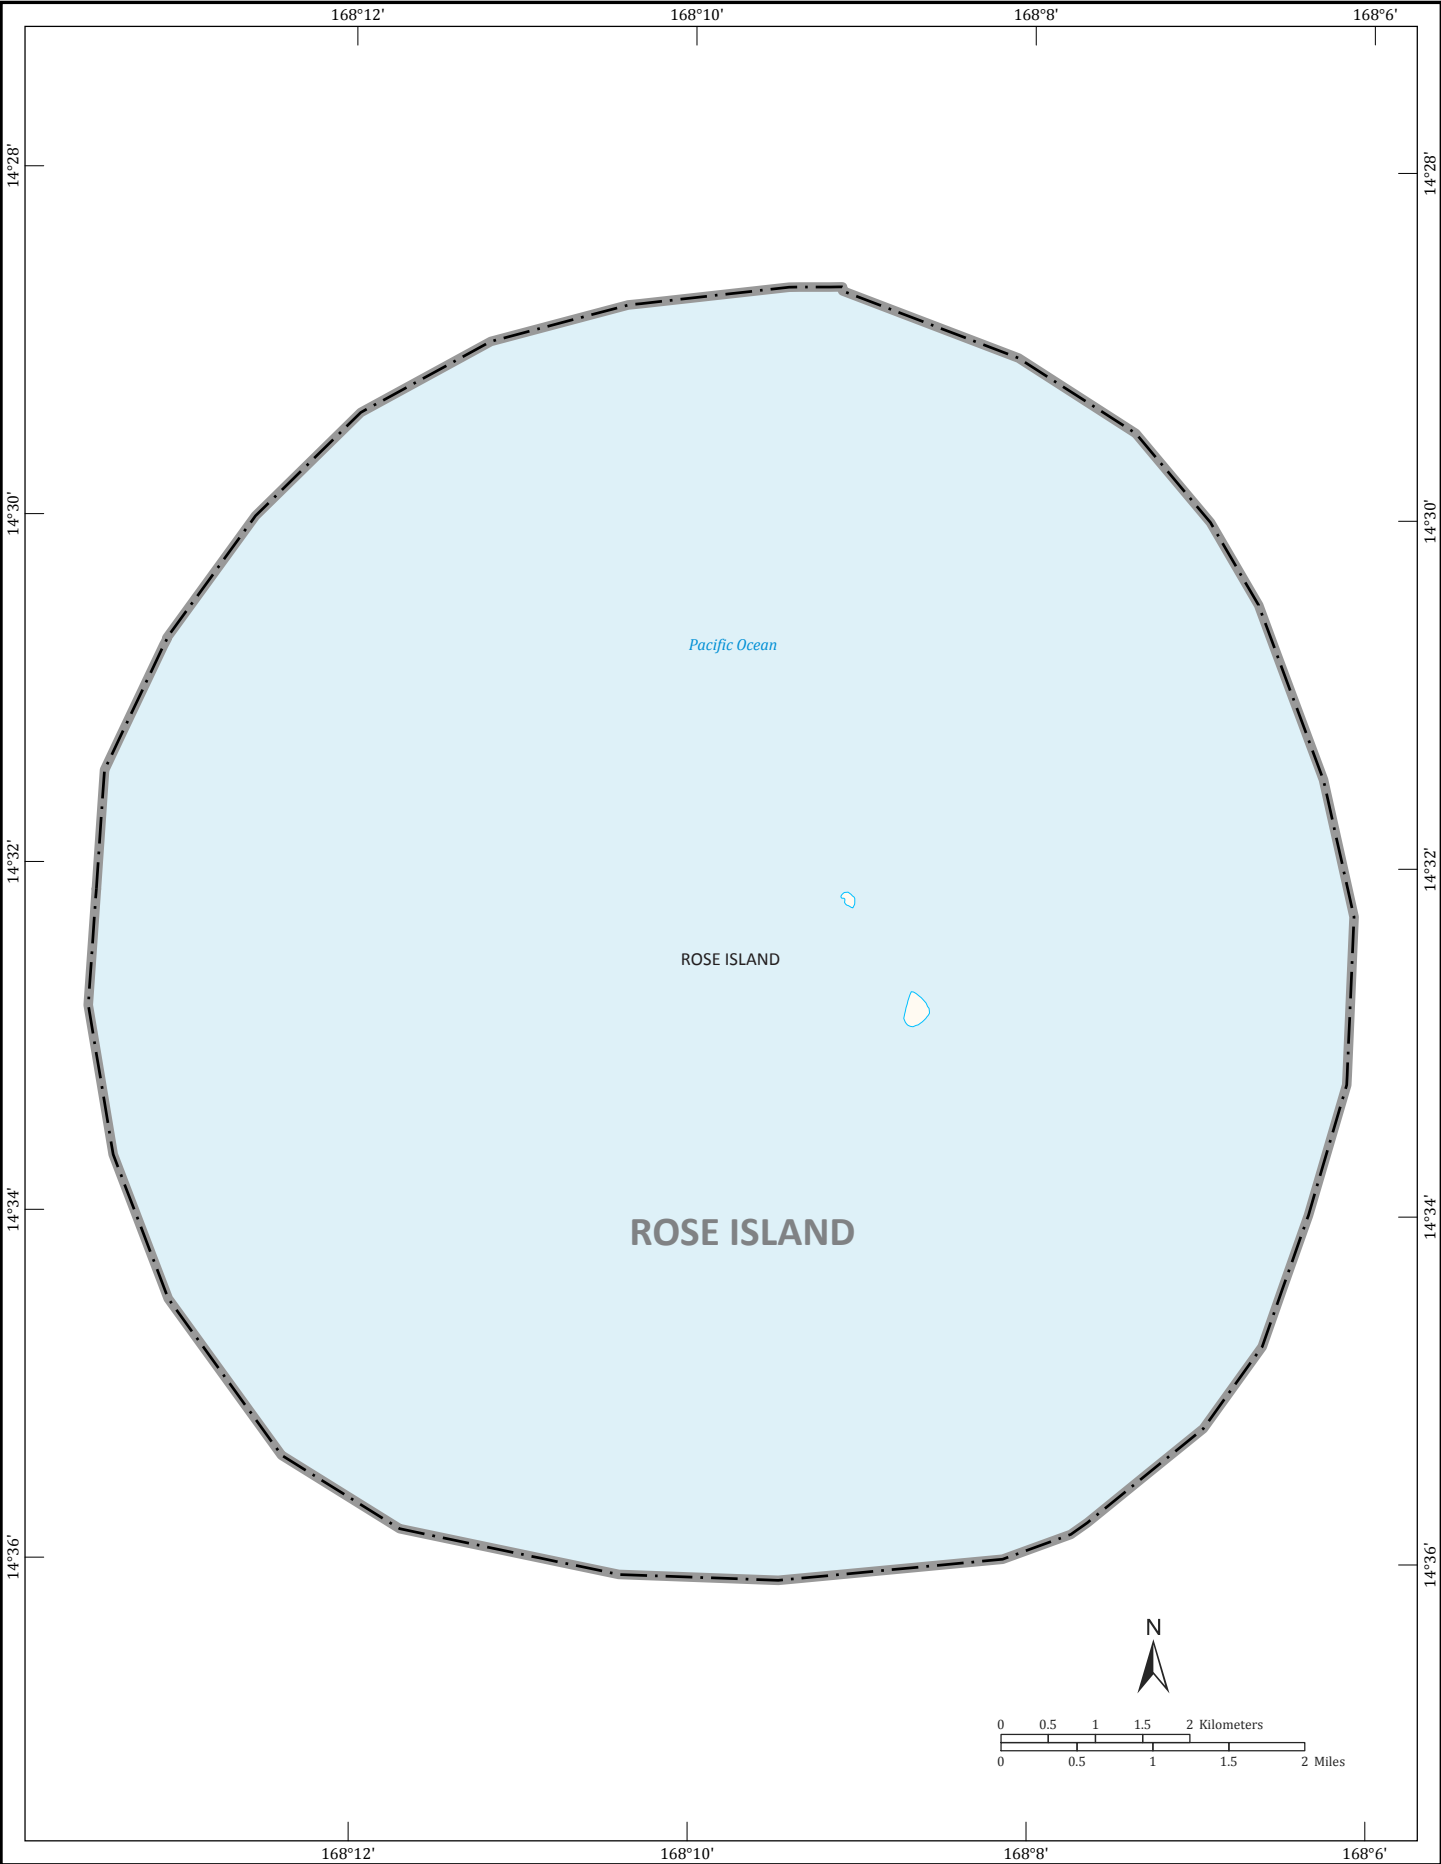

Eastern District, American Samoa

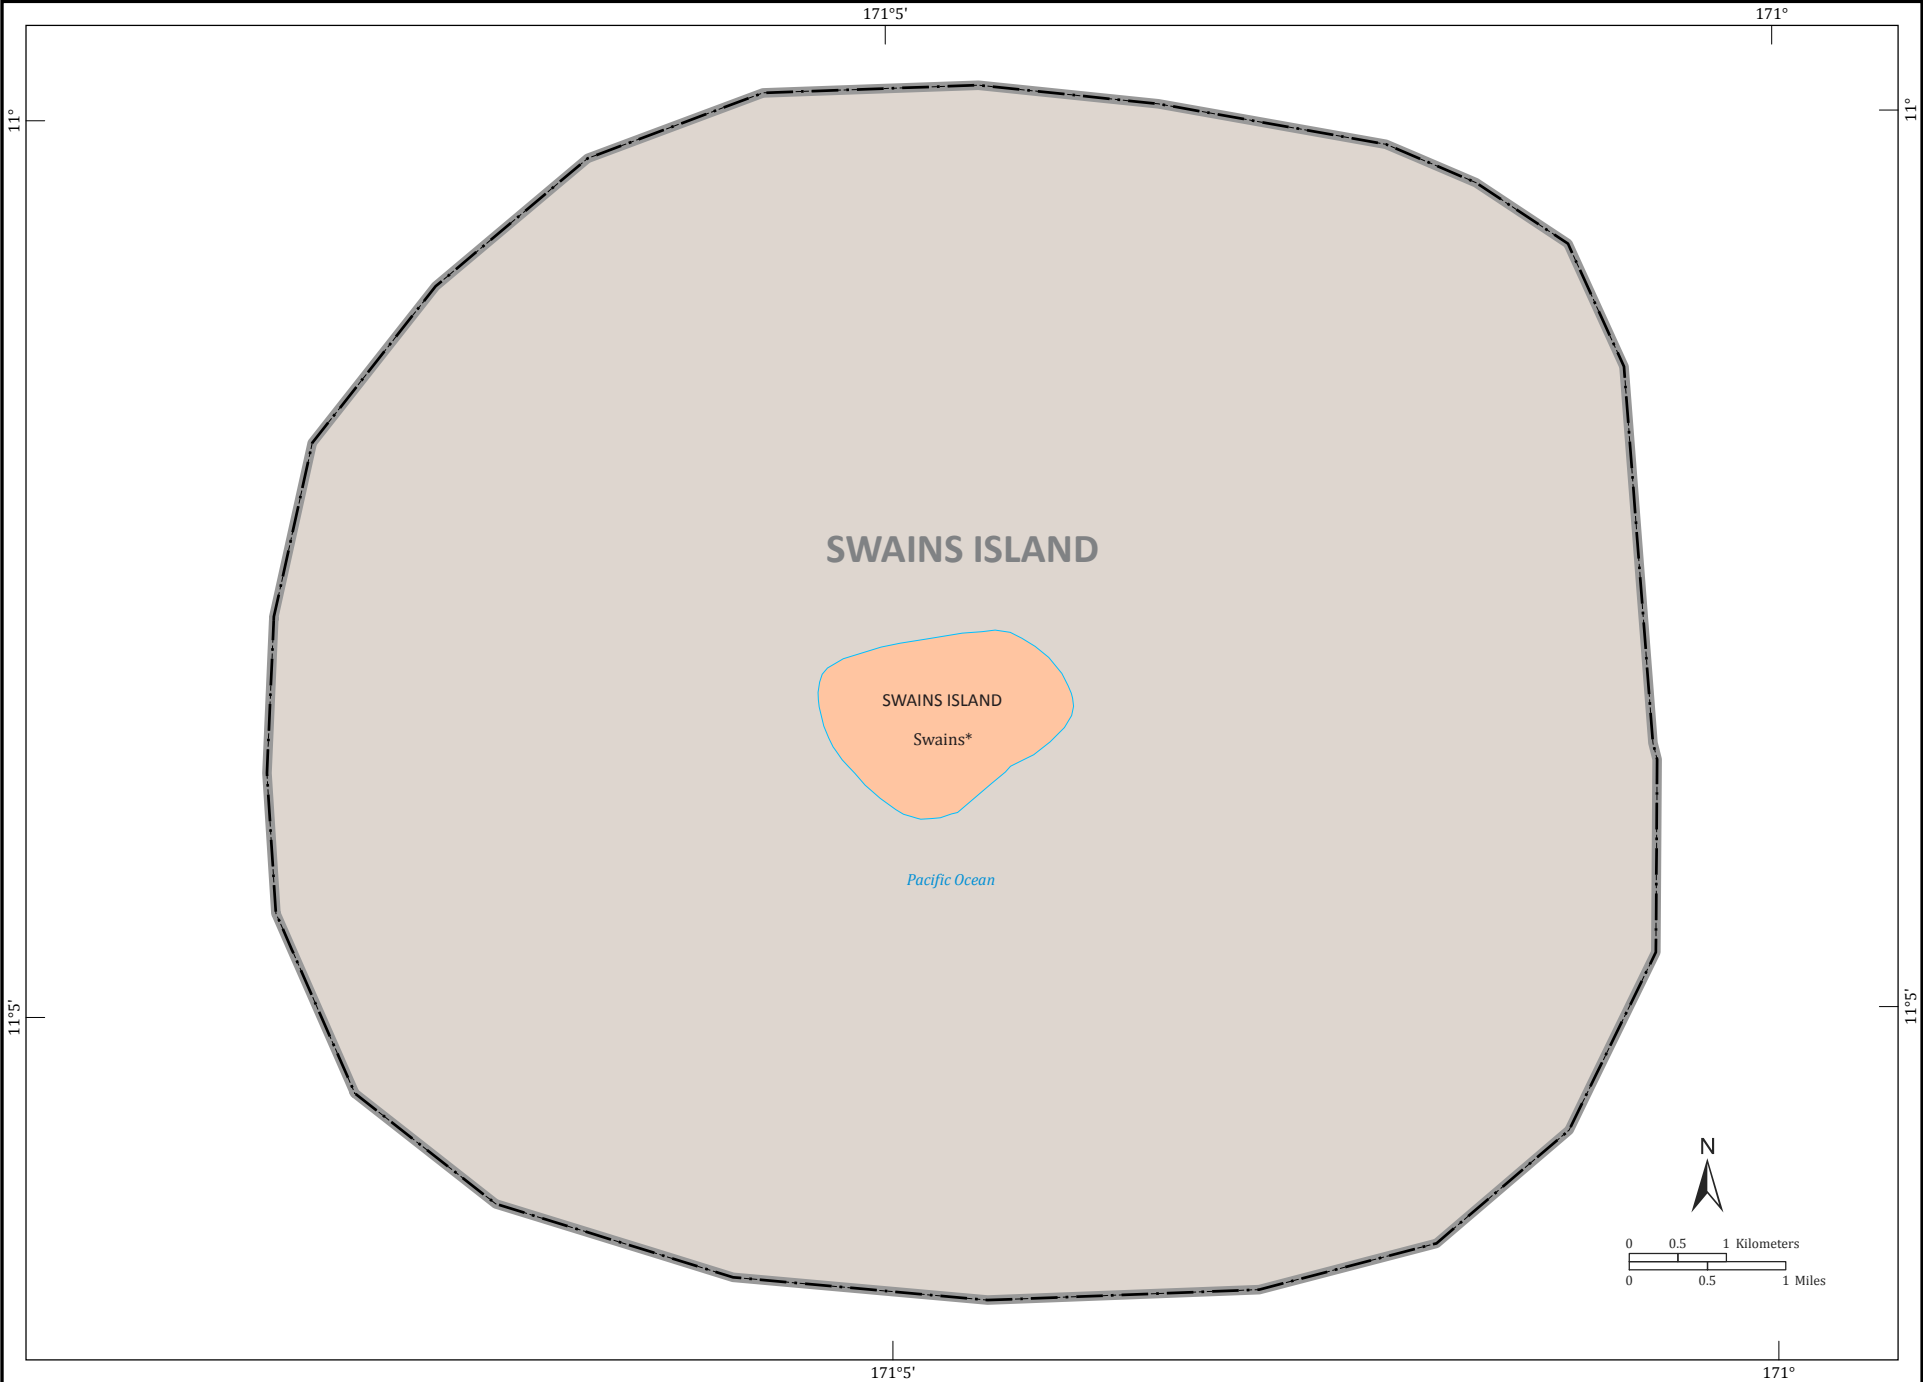

Manu'a District, American Samoa
